

Blind Motor

Quick and convenient

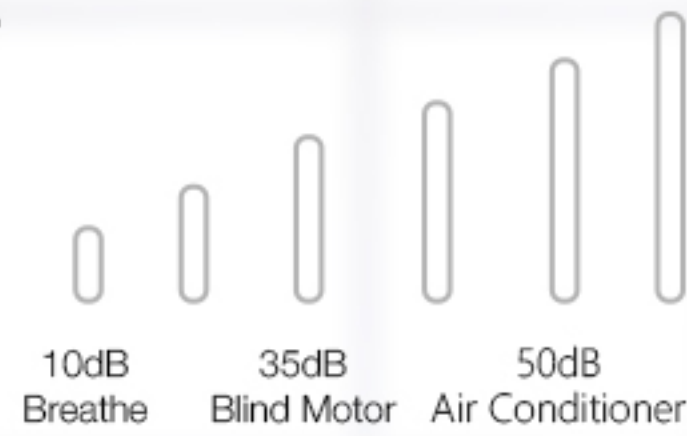

With HDL blind motors, you can easily control your blinds with a smart phone, wall panel or a remote.

Blind Motor

Super quiet

The blind motor runs so smoothly that only makes a sound lower than 35dB. It is barely noticeable by our ears.

Blind Motor

Control via a remote

The blind motor allows you to control the blind with a remote. You will find it so convenient especially when you are lying in the bed.

Blind Motor

- Supports open, stop, close and percentage control;
- Available for Buspro and KNX;
- Supports remote control;
- Ultra-quiet at 35dB;
- The motor and aluminum tube are assembled together by default;
- Fabric lab-dips are provided by default.
