

# 17CH Mix Actuator

A compact module which is able to control various types of devices, including lights, curtains and air-conditioners.

## Specs:

- KNX 17CH Mix Actuator is common used in projects with mass installation, like hotels, multi-dwelling buildings, etc.
- Comparing with other actuators, Mix Actuator takes up less space in one solution.
- The magnetic latching relays can be connected to high-power devices, for example, chandelier, LED lamps, etc.

# 19CH Mix Actuator

A compact module which is able to control various types of devices, including lights, curtains and air-conditioners.

## Specs:

- KNX 19CH Mix Actuator is common used in projects with mass installation, like hotels, multi-dwelling buildings, etc.
- Comparing with other actuators, Mix Actuator takes up less space in one solution.
- The magnetic latching relays can be connected to high-power devices, for example, chandelier, LED lamps, etc. And with 2 MOSFET dimming channels, you can get a more comprehensive solution.
